### **PERSONAL PROFILE:**

I have over 15 years experience in Broadcast Television. I am now freelance but my previous full time job I was working as a camera operator for a UK shopping Channel providing 16 hours of live television a day. I was promoted in 2004 to Camera shift leader responsible for a team of four operators covering all aspects of the channels production. I was responsible for the organisation of the days camera requirements and ensuring the highest quality possible in the channels output.

I am a calm, self-motivated person with good communication skills and a commitment to self-improvement. As a team player I enjoy overcoming the challenges of working to today's budgets and time restraints. My experience includes working with many different makes of cameras in a diversity of demanding live and recorded situations, both multiple camera studios and outside broadcasts. I have a good eye for detail and the technical skills required to bring Directors ideas to fruition.

In the studio I am an equally skilled handheld & ped camera operator. As a PSC/Lighting cameraman I have filmed for many promos, Infomercials & TV shows.

I have experience with pole cam and have some jib experience and have completed the Optex steadicam course. I also have experience with most makes of broadcast cameras & Lens Adaptors and RED Camera Systems.

All of my experience allows me to be confident with a variety of cameras, mounts and lenses as well as latest technology such as Solid State Drives & HD.

I enjoy my work immensely and bring my skills, energy & enthusiasm to every job I do.
